Skylar's Run Mission & Gameplay Guide

Each mission of Skylar's Run is expertly crafted to target one or more our 13 Cognitive Skills training and assessed throughout gameplay. This game play overview outlines each mission in detail - explaining the game mechanic of both the runner and the Fog Analysis - while also providing detailed ways for educators and coaches to support their students through each phase of the game.

Mission 1

Runner Action	Run to pass the mission. No bots.
Fog Analysis	Select molecules to freeze and decode them.
Player Support	Remind the player they only need to complete the Vigilock and Calabrus once. The Vigilock takes 10 minutes. Advise the player not to move or remove the headset to avoid restarting.

Missions 2 & 3

Runner Action	Continue to run to pass the mission. No bots.
Fog Analysis	Select molecules to freeze and decode them.
Player Support	Focus on maintaining speed, not on distractions or crystals.

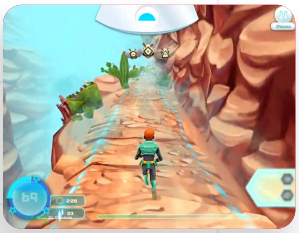

Missions 4, 5, & 6

Runner Action	Tap only smogbots that match the scanner rule (shape, symbol, color). Speed does not determine a pass.
Fog Analysis	Select and decode only the molecules that match the target scanner.
Player Support	Focus on tapping the correct bots, not on speed.

Missions 7, 8, & 9

Runner Action	Bots appear in groups. Tap the single correct bot and ignore the rest. Speed does not determine a pass
Fog Analysis	Select and decode only the molecules that match the target scanner.
Player Support	Take a deep breath before tapping the smogbots. For Mission 09, remind the player this is the last and hardest mission with groups of bots and that Mission 10 will be easier.

Missions 10, 11, & 12

Runner Action	Bots appear one at a time. Tap smogbots that match either the color or shape rule. The rules change quickly. Speed does not determine a pass.
Fog Analysis	Select and decode only the molecules that match the target scanner.
Player Support	Focus on either the shape or the color, never both.

Missions 13, 14, & 15

Runner Action	New distractions appear. The goal is to stay on the path.
Fog Analysis	Select and decode only the molecules that match the target scanner.
Player Support	For Mission 14, remind the player it's like Missions 7-9 where they must focus on one bot in a group.
